

Legal Copilot

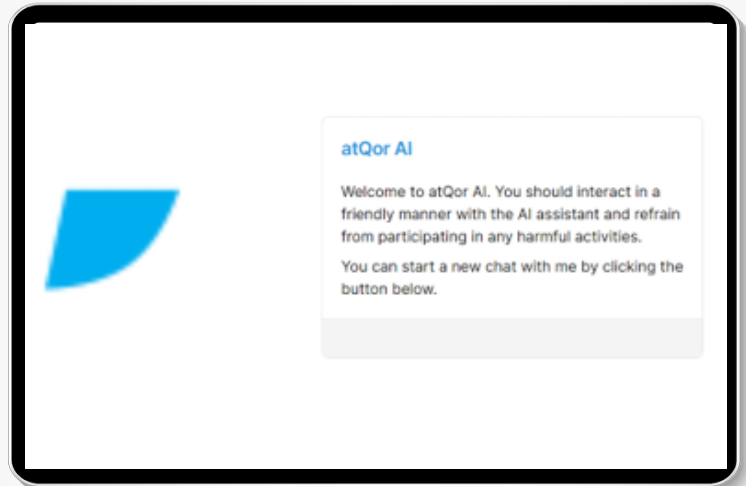

Navigate Legalities with Precision and Ease

Transform business decision-making by unlocking key insights at a faster pace using atQor Legal Copilot and Microsoft Power Platform

<https://www.atqor.com/services/microsoft-copilot-consulting/ai-driven-legal-co-pilot/>

According to **Goldman Sachs'** 2023 projections, around **44%** of legal tasks are positioned for automation by adopting generative **AI**.

atQor AI

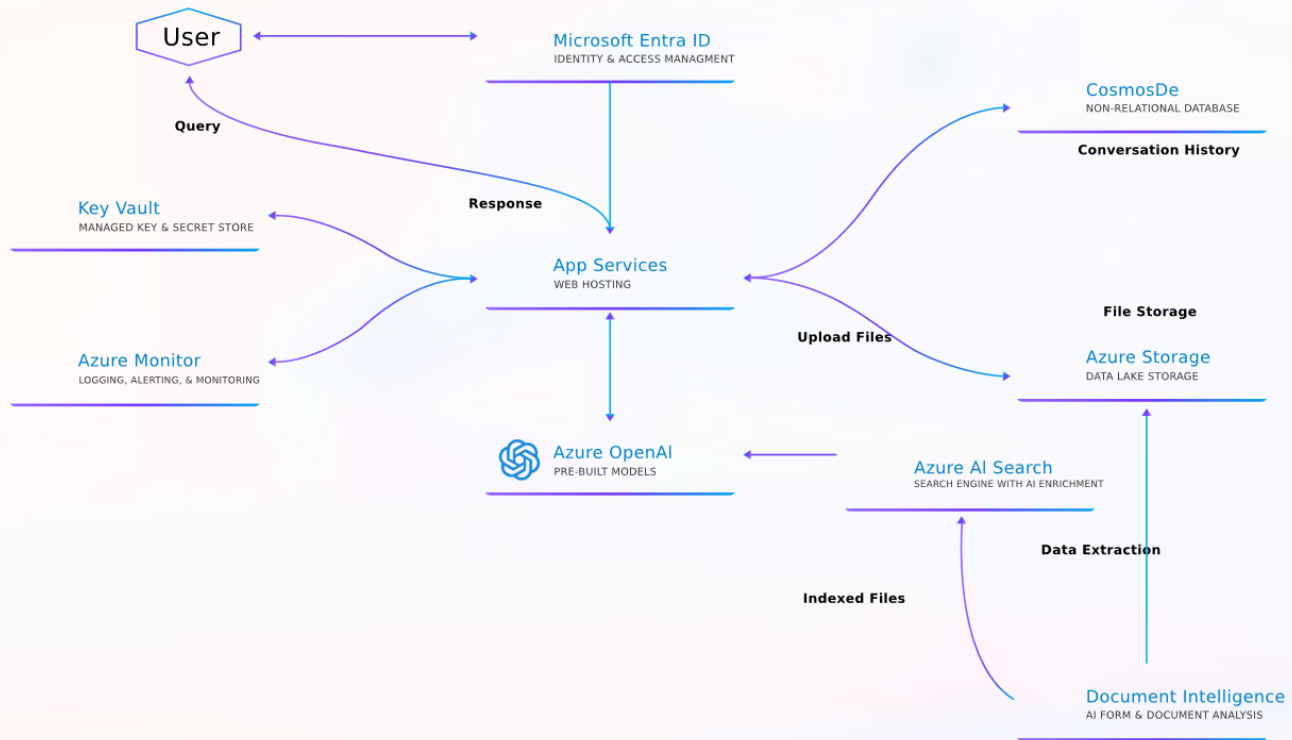

About

The Legal Copilot by atQor boosts legal departments' contract analysis, risk assessment, and decision-making, enhancing efficiency and accuracy. It bridges expertise gaps between various business decision-making groups like finance, commercial, and procurement.

UNIFIED CLOUD EXPERIENCE

AUTOMATED SYSTEM

INTELLIGENT

Achievements

- ✓ Achieve up to **40% faster** decision-making.
- ✓ Reduce contract review times by **60%**.
- ✓ **Satya** Highlighted about **legal copilot** used at our customer XYZ "XYZ's use of legal copilot is fascinating use case of bridging the expertise gap just in time and breaking the human expertise silos"

Challenge

- ✓ The traditional manual approaches to **contract review** are **time-consuming, error-prone, and expensive**. The challenge lies in efficiently extracting key information, conducting thorough comparisons, generating insights, flagging risks and mitigating them

Solution

- ✓ Simply **upload a legal document** and start selecting pre-populated questions or ask questions of your choice in the text box like "Please find the parties involved in this contract".
- ✓ We can also connect to an existing Document Management System or Contract management system.
