

Elevate Your Business:  
Empowering Promoters with Smart Solutions!

<https://www.atqor.com/services/microsoft-copilot-consulting/>

Implementing **generative AI** could increase sales productivity by approximately **3 to 5 percent** of current global sales expenditures - According to **McKinsey Report**

atQor AI

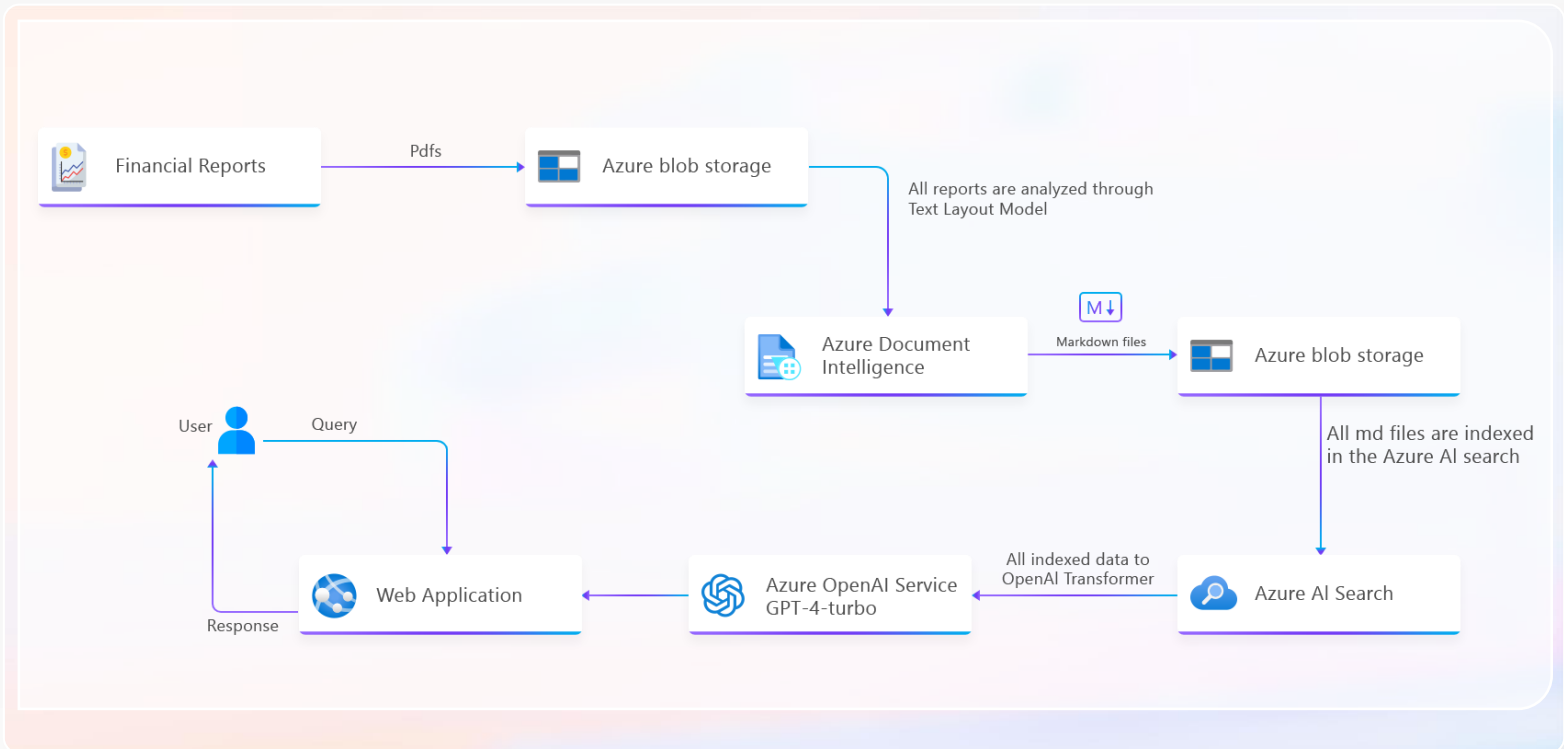

## About

Our smart solution organizes all relevant documents, like annual reports and meeting notes, in a structured document vault. This allows our Chatbot to access files efficiently, with sections properly labeled for contextual understanding. Images within documents are parsed using Computer Vision to extract text, enhancing accessibility and analysis.

UNIFIED CLOUD EXPERIENCE

AUTOMATED SYSTEM

INTELLIGENT

## Achievements

- ✓ Accelerate **Business Growth**: Achieve Up to **30%** Faster Decision-Making with **Smart Solutions!**

## Challenge

- ✓ Accessing and analyzing unstructured information from annual reports can be time-consuming and inefficient. Without a structured approach, the Chatbot may struggle to provide accurate answers to user queries. Additionally, manual extraction of text from images poses challenges for data retrieval and analysis.

## Solution

- ✓ Our Chatbot streamlines information access by allowing users to ask questions, compare parameters across multiple years, and retrieve stored answers. It references specific page numbers in annual reports for detailed information, reducing token usage and improving response accuracy.
